-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because there are two figures labeled "Figure 1", and there are two figures labeled "Figure 4". The figures are not identical. It is suggested that Figure 1 and Figure 4 on the second sheet be deleted. It is further suggested that the border surrounding the figures on the second sheet also be deleted. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "said arcuate" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3724

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 5-9, 11 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Helm, Sr. (5,083,375). Helms, Sr. discloses guide member 12; channel juxtaposed between elements 16 and 18; support arm 24, 28a and 28b; U-shaped portion 24, 28a, 28b; linear portion 28a, 28b; space as seen in figures 1 and 3; body piece 44; handle 50; cutting assembly shown in figure 8 attached to handle 50; workpiece 14; cut line in figure 13; inner side is the top of body piece 44 in figure 7; outer side is the bottom of body piece 44 in figure 7; it is implied in figures 14 and 15 that body piece 44 moves across guide member 12 in order to completely sever the workpiece 14 as shown in figure 15; slider member 52, 54; channel with non-circular cross section in figure 16; bolt 62; roughly c-shaped cross section of guide member 12 in figure 1; method of cutting sheeted material in figures 13-15; longitudinal axis is collinear with guide member 12; wing bolt 62; top wall 18; bottom wall 20; rear wall 16; first side of guide member is the top of guide member 12 as shown in figure 1; second side of guide member 12 is the bottom edge of element 18; second, free end of support arm 28a and 28b is at the bottom of the support arm in figure 1.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helm, Sr. in view of Dunn (4,574,480). Helm, Sr. discloses everything as noted above, but does not disclose a holder member and two cutter wheels. However, Dunn teaches holder member 12, 13, 14 and teaches cutter wheels 15, 16. It would have been obvious to provide a holder member and cutter wheels in Helm, Sr. as taught by Dunn in order to increase the cutting surface of the tool.

8. Claims 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helm, Sr. in view of Dunn (4,574,480). Helm, Sr. discloses guide member 12; first side of guide member is the top of guide member 12 as shown in figure 1; second side of guide member 12 is the bottom edge of element 18; body piece 44; handle 50; cutting assembly shown in figure 8 attached to handle 50; support arm 24, 28a, 28b; linear portion 28a, 28b; workpiece 14; cut line in figure 13; cube 44; slider member 52, 54; wing bolt 62; square cross section channel in figure 16. Helm, Sr. does not disclose a holder member and does not disclose two cutter wheels, however, Dunn teaches holder member 12, 13, 14 and teaches cutter wheels 15, 16. It would have been obvious to provide a holder member and cutter wheels in Helm, Sr. as taught by Dunn in order to increase the cutting surface of the tool. Note in Dunn, upper portion 13; medial portion 14; lower portion 12; upper cutter wheel 16; lower cutter wheel 15; interface of cutter surfaces in figure 4.

Response to Arguments

9. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
